Memorandum

: SAC, DALLAS (100-10461) DATE: 9/17/64

OM : ASAC KYLE G. CLARK

BJECT: LEE HARVEY OSWALD, aka
IS - R - CUBA

At 8:15 am. this date, Section Chief WILLIAM A. BRANIGAN telephonically made reference to SA GEMBERLING's report dated 9/9/64. Specific reference was made to pages 42 and 43 regarding the interview of ~~WILLIAM~~ HARTMAN and his wife EDNA, concerning a hole in the grass near the area of the assassination. WAYNE

Mr. BRANIGAN stated that upon reading Assistant to the Director BELMONT raised the obvious question "Has Dallas made a check to determine if there is a bullet in the area and has it has been recovered? If this has not been done, why not?"

Mr. BRANIGAN suggested that if a check has not been made of the area that a mine detector be obtained to determine if there is any material in the area described. He further advised that if this check has been made and reported, he desired a return call as to the reference. If the check has not been made, they are holding the dissemination of referenced report for an insert to be designated as page 43-A indicating the results of the check.
